White Paper v 1.0

Feb 2024

Abstract

As you know, having community is a basic need in today's modern world.

The lack of a platform that helps create a community made us build a community building platform.

1Drop is a platform developed for this purpose.

Introduction

1Drop is the first community maker platform that operates on the binance smart chain platform, which is a safe, practical and easy platform.

To create a community when you are a business owner, you need advertising, and one of the methods of advertising and attracting members for your business is airdrop.

For this purpose, the 1drop platform has been designed and built so that you can launch an airdrop related to your business and build your community in this way.

System

- The purchase of Telegram bot and airdrop system is done through our website (<https://1Drop.pro>) and the price of the plans changes momentarily compared to the price of the token.
- Connect your wallet and view your user dashboard from your profile.
- Beautiful user interface and easy to use.
- The initial prices of the plans after launching the system according to the table

Telegram bot product (Airdrop bot)							
Plan	Link	Ref	Price (BNB)	Min 1drop token	Max 1drop token	Min price (BNB)	Max price (BNB)
Golden	5	10	0.000034	3,000	30,000	0.102	1.02
Silver	3	7	0.000032	3,000	30,000	0.096	0.96
Bronze	2	3	0.000030	3,000	30,000	0.09	0.9
